Work Experience

Software Development Engineer, *(Bajaj Finserv Health Ltd. - Pune, IND)* *July 2023 – Present*

- Directed backend development across multiple teams, maintaining **zero P0 issues** and reducing defect rates to **0.02 per story** through structured reviews and reliable delivery practices.
- Acquired comprehensive **HealthTech domain knowledge** covering **IPD/OPD service workflows**, insurance claim life cycles, reimbursement vs. cashless models, and hospital coordination processes.
- Built an in-house URL shortener and deep-linking system supporting **12,000 TPM**, eliminating third-party dependencies and saving **30 lakhs annually**.
- Designed SocketRx, a **generic WebSocket Gateway**, improving development efficiency and cutting WebSocket implementation time by 60%.
- Designed an AI-assisted Voice Prescription feature using speech-to-text and LLM integration, enabling automatic prescription drafting for doctors and contributing to a measurable increase in PMS adoption.
- Developed a unified **notification platform** enabling WhatsApp, SMS, email, and push delivery of **30,000+ daily messages**, lowering communication-related failures by 95%.
- Implemented a **unified push notification service** supporting token lifecycle management and **FCM/APN** integrations, reducing external platform expenses by 85%.
- Created the backend for the Hospital IPD Concierge platform, inspired by **Salesforce case and task management workflows**, enabling streamlined task orchestration and reducing overall discharge time by 3 hours.

Associate Software Development Engineer, *(Bajaj Finserv Health Ltd. - Pune, IND)* *June 2022 – June 2023*

- Managed and enhanced entire B2C journey, including doctor listing, doctor slot management, and appointment booking flow.
- Led the migration of the company-wide chat and video infrastructure to a new provider, **reducing operational costs by 50%** while ensuring backward compatibility across all integrated products.
- Delivered a centralized **caching service** using Elasticsearch for location intelligence, reducing dependency on external APIs and lowering costs by 80%.
- Adopted **event-driven patterns** using **Azure Service Bus and Kafka**, reducing internal service-to-service interactions by 20%.
- Built the backend for "Ask Free Question," enabling scalability, localization, and improved **SEO performance (+50% traffic)**.

Intern, *(Bajaj Finserv Health Ltd. - Pune, IND)* *August 2021 – May 2022*

- Stabilized chat, audio, and video communication systems using Twilio and Exotel, ensuring consistent **reliability for 20,000 MAU**.
- Improved performance of critical APIs and database queries, **cutting response times by 70%** and reducing **DB load by 20%**.
- Developed the **Instant Consult doctor allocation engine**—inspired by ride-matching systems—boosting appointments by 40% with zero cancellations.
- Modernized legacy components by migrating them to **NestJS and Spring Boot**, significantly enhancing maintainability and code quality.

Skills

- **Languages:** Java, TypeScript, JavaScript, YAML, SQL
- **Frameworks:** Spring Boot, Spring WebFlux, Node.js, NestJS
- **Technologies:** R2DBC, JPA, WebRTC, Socket.IO, Redis, MongoDB, PostgreSQL, OracleDB, ELK, React
- **Tools:** Docker, Git, Apache Kafka, Azure Service Bus, APIM, ArgoCD, Keda
- **Other:** Microservices, Event-Driven Architecture, WebSockets, System Design, AI Integration

Education

B.Tech — Computer Science *(Acropolis Institute Of Technology and Research, Indore)* *2018-2022*

Honors And Awards

• **MVP of the Year 2025** • MVP Q4 2024–25 • Hero of the Month • Sharp Shark Award
